Education

Computer Science   **Mar 2012 - Jul 2016**
Eritrea Institute of Technology (EIT), Asmera
Completed a comprehensive program that covered foundational and advanced concepts in computer science, including algorithms, data structures, software development, networking, databases, and artificial intelligence. Emphasized both theoretical knowledge and practical skills, with a focus on problem-solving, programming, and computational thinking.

Web development   **Sep 2024 - May 2025**
Evangadi, Louisville
Completed an intensive, hands-on web development bootcamp focused on equipping students with the technical skills necessary for front-end and back-end web development. The curriculum covered a wide range of web technologies, frameworks, and best practices, emphasizing project-based learning and real-world applications.
